- **April 2015:** **Submission of grant applications**
- **April 2015:** **Notification of acceptance of abstract**
- **31 May 2015:** **Submission of poster if accepted**
- **1 June 2015:** **Early Bird registration for side events (10 %)**
- **24 July 2015:** **Final registration deadline**

The *IRON CURTAIN Foundation Worldwide* and *WiN IAEA Chapter* with the support of the Czech Permanent Mission to the UN, OSCE and other International Organizations in Vienna presented an

Exhibition at the VIC Rotunda on 7–15 January 2015

SECRET NUCLEAR WEAPON DEPOT

In the summer of 2013, an executive member of Women in Nuclear (WiN) IAEA learned about the existence of the Atom Museum and attended the opening ceremony in the Czech Republic. In November 2013, about 15 WiNners IAEA visited the military site near Misov in the Czech Republic, where the formerly secret bunker is located. We walked through the bunker in awe, and the idea was born to organize an exhibition of the Atom Museum here in the VIC Rotunda.

This historical exhibition in the VIC Rotunda was a great success. It displayed photos showing the inside of the bunker that gave you an idea of what it must have been like in those Cold War days, when soldiers were guarding the bunker, with nuclear missiles ready to be deployed.

WiN IAEA has the pleasure of offering a one-day trip to the Atom Museum in Misov, Czech Republic, to WiN Global Conference participants on Friday 28 August 2015.

WiN Retreat Bad Loipersdorf

29 Jan—1 Feb 2015

The 2015 WiN retreat was held in Bad Loipersdorf and offered the participants the opportunity to enjoy health and spa treatments as well as reflecting on the plans for 2015. The few WiNners attending spent a great time together. Our agenda contained the following topics:

Women in Nuclear Meet Atoms for Peace — Conference preparation:

- o Budget update (estimated 300 participants)
- o Meeting with OPIC: key messages
- o Programme:
 - Invited speakers (actual status)
 - Outline of thematic content of each session (for communication to panel-lists)

Other upcoming events and AOB.

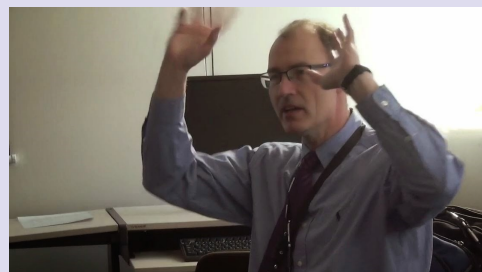

WiN IAEA Chapter Seminar

D. Dudenhöffer on Cyber-Security

12 February 2015

COMPUTER SECURITY IN A NUCLEAR WORLD

Donald Dudenhöffer, an IT Security Officer of the Department of Nuclear Safety and Security, Division of Nuclear Security at the IAEA, started the series of WiN IAEA seminars in 2015 on 12 February with his talk on cybersecurity. During his presentation, Mr. Dudenhöffer shared some examples from recent years on security breaches of IT systems in major corporations around the world and demonstrated how severe the consequences of such attacks could be. He gave an overview of IT security systems and several types of security breaches. Also, Mr. Dudenhoeffer stressed that the human factor was the weakest link in most IT security systems and gave examples of recent phishing attempts. The talk concluded with an open invitation for all WiN members to attend the IAEA Cybersecurity Conference this June.

WiN Global Executive and Board Meeting

during the PIME Conference in Bratislava

2 March 2015

WiN IAEA Chapter President and Executive Eva and also Vice-president and Board Member Gabi attended the WiN Global meeting in Bratislava.

The main topic on the agenda was the 2015 conference status, and confirmation of the next WiN conferences in UAE (2016), China (2017) and potentially in Argentina (2018).

In 2016, the WiN communication workshop, traditionally organized by WiN during PIME, will be held in WNA London instead, most likely in spring by WiN UK. It was decided that in future WiN workshops during PIME might be organized by local chapters as wished and feasible. The next PIME conference 2016 will be held in Romania.

The strategic plan members of WiN Global chaired by Irene Aegerter will meet on 15 May in Vienna. Eva and Gabi were and will continue to be members of this important initiative.

The WiN Global meeting was organised and sponsored by WiN Slovakia!

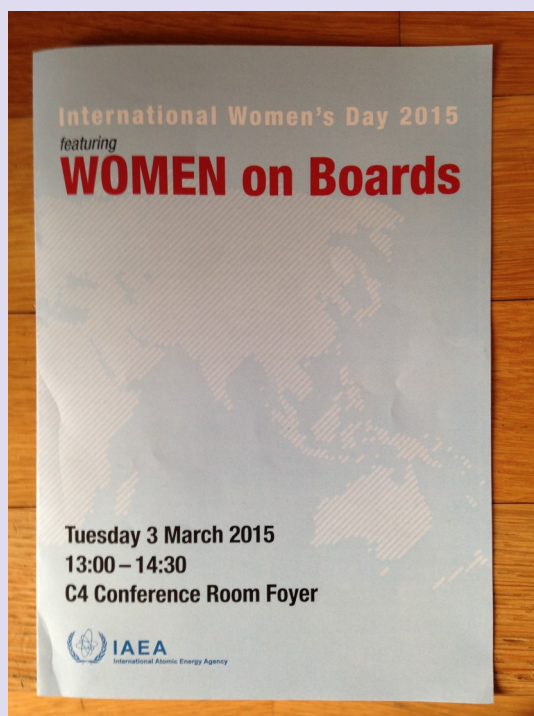

Observance of the International Women's Day in IAEA

3 March 2015

IAEA

Women on Boards

On 3 March 2015 during the Agency's Board of Governors meeting, the IAEA hosted a panel discussion to celebrate IWD 2015, moderated by Janice Dunn Lee, DDG-MT, with prominent women contributing: M. Ziakova (present Chair of the BoG), A. MacFarlane (Chair of the US Nuclear Regulatory Commission 2012 — 2014), M.E. Hoedemakers (Chair of the Nuclear Energy Agency Steering Committee) and S. di Pippo (Director of the UN Office for Outer Space) shared their experiences as women in high level committees, and work places and discussed how to deal with work/life balance. The panel discussion was concluded with questions from the audience and with more opportunities to speak with the panellists later on.

INMM Science Fair

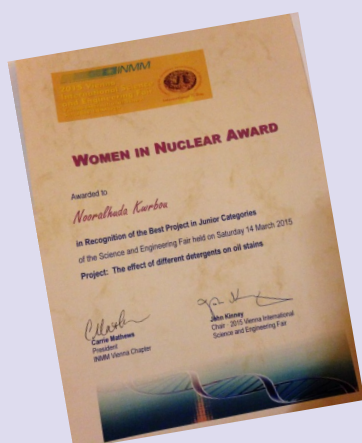

14 March 2015

Vienna International School

WiN Special Awards

As every year WiNners participated at the INMM Science Fair as judges of the students' projects and awarded a special prize for the most impressive female contributions. From 125 students representing 11 International Schools in 74 scientific projects the selection of the best was not easy for the judges.

This year the WiN awards went to Paulina Olszewska and Nooralhuda Kwrbou from the Riverside School Prague in the junior category for their project 'The effect of Detergents on Oil Stains' and to Melisa Sirotkova in the senior category from the British International School Brno for her project 'Wind Tunnel Investigations'. WiN congratulates all Science Fair students for outstanding achievements.

Miscellaneous

- Visit <http://www.srf.ch/play/tv/reporter/video/mission-im-possible?id=f1a164e1-e604-445b-8d7c-c6eb9a5aab5c> for latest news on the Suisse Nuclear Programme (in German only)

- New Editorial Board of the WiN Newsletter

Due to the leave of Jessica a new team is taking over the newsletter:

Susan Cohen-Unger, Amy Zotter-Amenu, David Voigt and Gabi Voigt

Suggestions, proposals or comments how to improve the newsletter to any of them,

Upcoming Events
